WHAT IS ʌ TACO?

A taco (Pronounced tɑːkoʊ) is a traditional Mexican dish composed of a corn or wheat tortilla folded or rolled around a filling. A taco can be made with a variety of fillings, including beef, pork, chicken, seafood, vegetables and cheese, allowing for great versatility and variety. A taco is generally eaten without utensils and is often accompanied by garnishes such as salsa, avocado or guacamole, cilantro (coriander), tomatoes, minced meat, onions and lettuce.

NO REALLY, WHAT IS TACO?

Taco is a hacked client coded by EliteTaco9000. Taco focuses on hacks that actually work. No more worrying if your step hack will get you kicked for flying (there are seriously clients that will do this). No more worrying if your kill aura won't get you past 5 kill-streak on a kit-pvp server because it blows ass. With Taco, all of your hacking dreams come true!
